Subject: Study Plan Reports Delivered to the Collaborative/Comments  
Oroville Facilities Relicensing Program  
Federal Energy Regulatory Commission Project No. 2100

Attached is a list of the Study Plan reports and deliverables that have been shared with the collaborative over the last 14 months. Please peruse the attached list and provide any comments or input your review of these documents has generated since their distribution. We are seeking any factual corrections to the documents or specific omissions or deviations relative to the collaboratively-generated scopes of work for these studies that were formulated within the Alternative Licensing Process. For reference, the final ALP generated Study Plans can be found on the Oroville Facilities Relicensing web site, and these were also previously shared with the collaborative on CDs. Please provide your written comments on the reports itemized on the attached list by February 29, 2004. All comments should be sent to me:

Mr. Rick Ramirez, Program Manager  
Department of Water Resources  
Oroville Facilities Relicensing  
1416 9th Street, Room 1601  
Sacramento, CA 95814

Many of the reports of the attached list have been distributed and available for many months. Depending on the nature and volume of comments or corrections received, the Department will either circulate an errata and comment appendix for addition to already circulated final reports and for attachment to future printings, or in some cases, we may reproduce an amended report.

We also plan to distribute with all remaining Study Plan deliverables a transmittal letter requesting corrections and comments within 30 days of the work group's receipt of the report. We look forward to your input as we are seeking this in the spirit of the collaborative. If you have any questions please call me at (916) 657-4963.

Sincerely,
